

entrada On-line Backup and Recovery

Enterprise protection for data and granular file recovery

It is not just about backing up business critical data - it's about recovering information as, and when required. It's not just about removing the time consuming, problem ridden job of manually inserting tapes - its about knowing your data is safe at all times.

Softsource offers customers a state of the art Data Centre to house their offsite backups in a local storage cloud. The entrada Data Centre is Tier 3 grade with multiple tiers of storage and resources to deliver you the security required when outsourcing a critical task like backups.

Benefits Include:

- No Capital expenditure
- Fixed monthly costs
- Easy to restore data
- Reduction of risk, greater security & peace of mind
- Frees up staff resources from daily backup duties
- Savings on storage
- Flexible plans to suite your exact requirements

Business data goes hand-in-hand with your business operations. Loss - or even the temporary inaccessibility - of business data interrupts your business process and can have detrimental effect on your bottom line. Conventional backup methods - such as tape - are unsatisfactory because of high failure rates during restoration, forgotten tape rotations, the difficulty in detecting problems with backups before performing restoration and high maintenance costs.

The entrada On-line Backup and Recovery offering takes full responsibility for best practice backup processes, giving you peace of mind with a guaranteed outcome. We offer a remote online backup solution that backs up incremental changes of your data daily, to our offsite cloud storage platform.

Every business has different needs and we offer a flexible solution to ensure your specific needs are met. Our experienced consultants will help architect the best solution to ensure your business data is safe and retrievable.

To receive a free consultation and discuss a solution to fit your specific business needs, please contact our team of experienced specialists.

COST INDICATOR

entrada Backup and Restore solution can be tailored to fit your exact requirements. Cost variables include number of servers, amount of data, frequency of backup etc.

45 cents per Gb data per month - (3 year contract)
Pricing excludes GST

- Backup status reports

Softsource's On-line Backup service has provided us with total peace of mind and confidence in our ability to recover and access our data. Following the Christchurch earthquake, we reviewed our recovery ability and found a number of areas that needed improvement. Softsource provided a solution to meet our specific needs and meet these improvements."

Dominic Whyte, IT Manager, Jasmx Ltd

"The Softsource on-line backup is not a one-size-fits-all solution – whether a business wants backups only, through to business continuity services, Softsource has the technologies under one umbrella to deliver the best fit for the company."

David Small, Technical Manager, Softsource Ltd
