Managed Print Services
powered by

What is MPS?

Managed Print Services (MPS) provides the right mix of services and supplies at a low print cost enabling you to focus on your business and what you do best – instead of spending hours managing your imaging and printing fleet.

3 easy steps to get printing.

- 1 Establish your print needs.**
How many users need printing? Do you need to print in colour? Do you need to scan/copy or fax? On average, how many pages do you print per month?
- 2 Select appropriate devices for your business.**
MPS provides a range of printers with low running costs. Simply choose the best printer to suit your needs and print volumes.
- 3 Contact your reseller to create a contract.**
Once you have decided on your preferred option, contact your reseller.

Managed Print Services make it simple for you by offering all service and consumables in one simple cost per page charge.

Under the Managed Print Service agreement you will receive the following:

Equipment Installation

HP service engineers will install any new devices.

Next business day onsite support

HP will provide next business day support for all printers under the MPS programme.

Automated consumables delivery

We track usage/pages printed which determine the best time to automatically order and send your consumables, so you never run out.

No hidden extras

What you see is what you get, there are no additional charges.

Removal of old printer equipment

HP will remove old printer equipment.

PageWide Printer Range

Balancing speed, quality, and cost in printing applications once meant sacrificing one benefit for another. Today, HP PageWide Technology overcomes these trade-offs with revolutionary and scalable designs that deliver quality and speed together—at a significant cost advantage—based on the latest HP printing innovations built on proven technologies.

HP PageWide Pro Managed P55250dw Printer

Print Speed: 50ppm mono, 50ppm colour

Networking: Wireless and Ethernet
