

Security - Navigating the Threat Landscape

Staying ahead of the game

Security - Navigating the Threat Landscape

Event Invitation

Softsource invites you to join us for an informative leading-edge presentation and industry insight, exploring the security concerns that organisations in NZ are facing in technology today.

With the WannaCry ransomware attack wrecking havoc earlier in the year – the importance of cyber security should be on the top of everyone’s mind. Keynote speaker Michael Brick will discuss cybersecurity from Microsoft’s perspective through the lens of the WannaCry attack, and the built in security provided by cloud services.

Adam Dodds from IDC will highlight industry trends within the security landscape while David Small, CTO, Softsource will provide a local perspective and share customer experiences.

- Cyber Security Risks today
- Cyber Security at the board level
- 6 key security Safeguards
- Dealing with your weakest links
- Best practice for protection
- Security Strategies

At the conclusion of the presentation a panel of industry experts will answer questions from the floor and participate in open discussions pertaining to security issues and planning.

This event is essential to all C-Level/Senior Management and Directors who wish to understand more about how current security trends can impact their organisation.
